Awesome puzzles. I'm not running after the prizepool, but I want to suck creator'su2665u2665u2665u2665u2665u2665 for his creativeness. Thank you for this gem.. Awesome puzzles. I'm not running after the prizepool, but I want to suck creator'su2665u2665u2665u2665u2665u2665 for his creativeness. Thank you for this gem.. This game is super janky which really isn't what you want in a puzzle game like this. Some of the difficulty just comes from not being confident about the english translation or things clipping through each other, etc. I'm also pretty sure it doesn't actually accept all correct solutions on floor 1. Cool concept to make the puzzles into a race and release them over time, but the execution just isn't there to make it worthwhile.. Recommend without doubt. <https://youtu.be/sPfwXpEw-Vc>. I love puzzle games and this looked very nice, not the greatest graphics perhaps but certainly good enough for this type of game. I started in a long room with a computer terminal type machine in the corner, I could enter stuff but nothing was doing anything, I must need a code! I searched everywhere and found nothing. Defeated at the first hurdle I looked at a youtube vid to get a clue. In the vid a line of text popped up telling him what to input! not in my game it didn't and no way in a thousand years would I have randomly guessed that. Any way, the next puzzle was quite hard, and some of it didn't make sense, misleading clues etc, but I did it and went to the third. The third was clicking on 16 tiles with rune like symbols on them. Again, no idea, no clue, back to the walkthrough. The answer made me refund it. I believe I am quite good at puzzles but these are stupidly hard with no logic and seemingly random answers. I stared, I sighed, I gave up, I watched youtube, I went WTF! I refunded.. Awesome game.. This game is super janky which really isn't what you want in a puzzle game like this. Some of the difficulty just comes from not being confident about the english translation or things clipping through each other, etc. I'm also pretty sure it doesn't actually accept all correct solutions on floor 1. Cool concept to make the puzzles into a race and release them over time, but the execution just isn't there to make it worthwhile.. As a person who likes a good puzzle to solve this has left a good first impression. The game is bolstered by a generous prize system that will likely ensure even an average solver will get their moneyu2019s worth, but for the best puzzle solvers possible crypto currency prizes await. If the puzzles stay consistently high level and delivers on their promise of increasing difficulty as new puzzles are revealed this will be a game to remember.. It's a bit strange to be recommending this game after all the prizes have been claimed, but I do genuinely like it. If you enjoy solving puzzles by thinking out of the box, you could do far worse. Yes, there are some rough edges, glaring omissions in terms of settings (there aren't any. at all. no volume control, no mouse sensitivity and no mouse look y invert). And yes, not all the puzzles are equally good. For some it is brutally difficult to get the final solution even when you know exactly what to do. And despite all those niggles, I had a lot of fun playing this, trying to figure out the solution, banging my head against the keyboard when I couldn't. Also, I appreciate what the developers were trying to do and the spin they gave on this. Now that the original puzzle race is over, it's likely that guides or hints will be written right here on Steam and that means that future players can go through the game at their own pace and not be stuck any longer than they want to be. So, taking all that into account, I'm gonna give this game a thumbs up.
